WOUND PREVENTION

Posey SkinSleeves AM Protect Fragile Skin

ANTI-MICROBIAL!

Indications: *Patients with fragile skin; to protect IV / wound sites and skin from tears and abrasions.*

These non-compression skin coverings provide a protective, comfortable fit for thin fragile skin. The soft, knitted yarn is a special blend of cotton/nylon/spandex/Chitosan rayon. Chitosan is a naturally occurring organic, moisture absorbing rayon fiber that offers anti-microbial properties.[1] This antimicrobial agent protects SkinSleeves against the growth of bacteria, fungi and molds, including odor-causing bacteria. Features color-coded sizing bands. Machine washable and Latex-free.

SkinSleeves can also help prevent patient disruption of medical treatments by camouflaging IV sites and wound sites. Also available are Padded SkinSleeves, featuring a thicker plush pile for extra protection and warmth and Gel SkinSleeves with pressure absorbing Pads strategically placed to protect bony prominences.

WOUND PREVENTION

ARM APPLICATION INSTRUCTIONS:

1. Beginning with upper arm opening, roll inside edge of SkinSleeve outwards; continue to roll until you reach the thumb opening.
2. Slip the arm opening of the SkinSleeve over the patient's hand, fitting the fingers through the finger opening and the thumb through the thumb hole.
3. Slowly unroll the SkinSleeve over the arm.
4. Adjust to desired placement. Hand and thumb section may be pulled back over the wrist, if preferred.
5. If desired, the patient's thumb can be removed from the thumb opening and the SkinSleeve "rolled up" on the wrist to uncover the palm.

LEG APPLICATION INSTRUCTIONS:

1. Beginning with upper leg opening, roll inside edge of SkinSleeve outwards until you get within 3" of the toe opening.
2. Slip the upper leg opening of the SkinSleeve over the patient's foot, pulling it up until the heel "crook" of the SkinSleeve fits snugly over the patient's heel.
3. Slowly unroll the SkinSleeve up the leg.
4. Adjust to desired placement.

NOTE: Inspect skin frequently for tears, lacerations, avulsions, abrasions, infection or other damage and determine appropriate treatment. Change product with new or laundered product in accordance with facility policy.

TO LAUNDER:

Machine wash and dry low temperature. For best results, hang dry.
